

PDF Creator Pilot technology

PDF Creator Pilot library is the pdf creation library that does not require any third-party applications or libraries to generate pdf files. Single **PDFCreatorPilot.DLL** is required to be distributed together with your product to add PDF generation features into your application.

PDF Creator Pilot uses *ActiveX* (it is also known as *COM*) technology. That is why the library can be used from [Visual Basic](#), [Delphi](#), [Visual C++](#), [VBScript](#) (as well as from [ASP](#)) and basically from *any* programming language that can use ActiveX components.
